

Welcome address of the President of the Association of Furniture and Woodworking Enterprises of Russia

Dear Colleagues!

On behalf of the Association of Furniture and Woodworking Enterprises of Russia I am glad to express support to the International Exhibition for Building and Finishing Materials and Technologies «RosBuild 2019».

I would like to mention that the number of events focused on the Russian manufactures is growing at the main exhibition fairgrounds of the country - EXPOCENTRE Fairgrounds. It fully refers to the project related to the construction industry - The Russian Construction Week RosBuild.

The crucial step has been taken to support the local manufacturer at the State level: The draft Strategy for the Russian Federation forestry development until 2030 is almost ready for signing. This document respects the interests of the wooden housing construction enterprises as well. We believe that our expert assessment accepted to this document on the elaboration stage is one of the most important achievements of the Association of Furniture and Woodworking Enterprises of Russia.

I should also mention the substantial growth of the forestry products' export in 2017 including building materials – laminated plywood, panel material, glulam etc.

On multiple occasions the most prestigious and highly professional exhibition fairgrounds will become the meeting point for representatives of the construction industry and related industries. And above all this is the main acknowledgement of Expocentre as the flagship of the exhibition activity of Russia.

I wish every success, fruitful and efficient work to all exhibitors!

Aleksandr Shestakov
President
Association of Furniture and
Woodworking Enterprises of Russia
Member of the Timber Industry Development
Council under the Russian Government
